SKILLS

I am a reliable and honest registered dental assistant seeking to apply my training, patient care skills and administrative skills to enhance the services provided within a clinic and contribute to the success of the team within an established dental practice through great communication skills and strong work ethic.

EXPERIENCE

Doctors Implants, San Antonio/New Braunfels - RDA

- Assisted in oral surgery procedures, including extraction of natural dentition and placement of All-on-4 implant systems
- Provided chairside assistance for suturing, PRF (Platelet-Rich Fibrin) placement, and post-operative procedures.
- Took post-surgical impressions to support the design and fabrication of prosthetic arches.
- Delivered hygiene education for implant abutments and gingival care, including Waterpik instruction.
- Performed prophylaxis on prosthetic teeth both intraorally and extraorally.
- Captured digital and analog records using the iMetric system and performed intraoral 3D scans with the PrimeScan device; handled calibration, maintenance, and troubleshooting of scanning equipment.
- Managed full sterilization workflows: instrument cleaning, bagging, autoclave operation, maintenance, cleaning, and spore testing; conducted routine waterline testing for all dental units.
- Operated 3D resin printers using CHITUBOX; utilized MEDIT heat-mapping technology for accuracy checks and adjustments
- Utilized Zoho and Open Dental software for scheduling, charting, documentation, and workflow management.
- Helped open and operate the New Braunfels location as the sole assistant; trained new assistants and supported growth of the surgical team.

- Independently managed a patient column for routine and non-routine appointments (1–2 hour blocks), consulting with the doctor as needed for diagnostics and radiographic review
- Took high-quality clinical photography before, during, and after procedures.
- Trimmed, smoothed, hand-stained, and prepared printed prosthetic healing teeth and night guards prior to placement.
- Provided post-operative instructions to patients and families; conducted patient recovery, monitored vitals, and removed IVs.
- Contacted patients for post-op and routine follow-up calls; assisted in patient transport, including wheelchair assistance.
- Handled difficult or escalated patients using effective de-escalation and communication strategies.
- Performed office errands using company vehicle, including transporting patients home after surgery.
- Completed detailed chart notes, transitions, and documentation to ensure clinical accuracy and continuity of care.
